

Graphyte

Graphyte is a collaborative tools for use by schools, educators, and students.

How to run:

Make sure you have NodeJS installed on your system, as well as npm.

Mac/Windows Users: check out this website: <https://nodejs.org/en/download/>

Linux Users: install NodeJS from your favorite package manager. (Ex: `sudo apt-get install nodejs`)

1. In the base folder, run `npm install`. This will download all the dependencies for the project.
2. `npm run build` will build the app, transpiling code from React to pure Javascript/HTML.
3. `npm start` will start the app, and launch a browser window displaying the app.
